Winter School on:

BIG SOFTWARE ON THE RUN
Where Software Meets Data

October 23 – 28, 2016, Ede, the Netherlands

Apply now!

Software Engineer, Process/Data Miner
or Data Scientist?

YOU'LL FIT RIGHT IN!

GENERAL INFORMATION

Big Software on the Run is a multi-disciplinary research program bringing together best computer science researchers in the Netherlands. Our mission is to advance and provide a scientific basis for *in vivo software analytics* by exploiting the large amount of run-time data. This winter school aims to create a network of research scientists and people from industry working in the field of software engineering and data analytics.

TOP CLASS SPEAKERS
